of the Year 2022  
(JAPAC)**

*My tutor was Nandagopal. I felt lucky to have such a knowledgeable and articulate tutor who often used examples from his own work history to add authenticity to the course material. He went out of his way to ensure we were comfortable throughout and kept us engaged.*

## SECTOR - TECH MULTINATIONAL

Our client is an American multinational technology company that provides hardware, software and consulting services. It is one of the largest, oldest and best known tech brands in the world.

## CHALLENGES

This major international tech company had a team requiring skills in Nutanix ECA (Enterprise Cloud Administration), enabling administrators, architects, and business leaders to manage Nutanix clusters datacenters. The client had experienced problems with a previous training provider as training had not covered important areas that had been expected from the agenda. Previously, training had been badly planned and executed.

## SOLUTIONS

Our expert Nutanix trainer, Nandagopal Siddegowda, reassured the client that the pre-set agenda would be covered and we would work closely with them to ensure their training needs would be fulfilled. We prepared a detailed agenda for the client, specifying topics to be covered with labs, as theory, or as demos by the instructor. The client had a clear understanding of what to expect from the training, which was tailored to their specific needs. We successfully delivered a customized Nutanix ECA training program to the client's team of engineers.

## OUTCOMES

By upskilling in Nutanix cloud technology through our training program, this client's engineers are now equipped with the knowledge and skills required to work with Nutanix cloud technology effectively. This has led to increased efficiency, productivity, and quality of work. Additionally, upskilling their engineers has helped the client stay competitive in the market by adopting new technologies and staying up-to-date with industry trends. Finally, investing in their employees' professional development has helped the client improve employee satisfaction, engagement, and retention.
