

# **CHECK POINT**

# CERTIFIED SECURITY EXPERT

#### **AUDIENCE**

Technical Professionals who architect, upgrade, maintain, and support Check Point products.

#### GOALS

Learn advanced concepts and develop skills necessary to design, deploy, and upgrade Check Point Security environments.

### **PREREQUISITES**

CCSA Training or Certification, fundamental Unix and Windows knowledge, certificate management experience, system administration and networking knowledge.

# **TOPICS**

**Advanced Deployments** 

**Management High Availability** 

**Advanced Gateway Deployment** 

Advanced Policy Configuration

Advanced User Access Management

**Custom Threat Protection** 

Advanced Site-to-Site VPN

**Remote Access VPN** 

**Mobile Access VPN** 

**Advanced Security Monitoring** 

Performance Tuning

**Advanced Security Maintenance** 

## **OBJECTIVES**

- Identify basic interfaces used to manage the Check Point environment.
- Identify the types of technologies that Check Point supports for automation.
- Explain the purpose of the Check Management High Availability (HA) deployment.
- Identify the workflow followed to deploy a Primary and solution Secondary servers.
- Explain the basic concepts of Clustering and ClusterXL, including protocols, synchronization, connection stickyness.
- Identify how to exclude services from synchronizing or delaying synchronization.
- Explain the policy installation flow.
- Explain the purpose of dynamic objects, updatable objects, and network feeds.
- Understand how to manage user access for internal and external users.

- Describe the Identity Awareness components and configurations.
- Describe different Check Point Threat Prevention solutions.
- Articulate how the Intrusion Prevention System is configured.
- Obtain knowledge about Check Point's IoT Protect.
- Explain the purpose of Domain-based VPNs.
- Describe situations where externally managed certificate authentication is used.
- Describe how client security can be provided by Remote Access.
- Discuss the Mobile Access Software Blade.
- Explain how to determine if the configuration is compliant with the best practices.
- Define performance tuning solutions and basic configuration workflow.
- Identify supported upgrade and migration methods and procedures for Security Management Servers and dedicated Log and SmartEvent Servers.
- Identify supported upgrade methods and procedures for Security Gateways.

#### **EXERCISES**

- Navigating the Environment and Using the Management API
- Deploying Secondary Security Management Server
- Configuring a Dedicated Log Server
- Deploying SmartEvent
- Configuring a High Availability Security Gateway Cluster
- Working with ClusterXL
- Configuring Dynamic and Updateable Objects
- Verifying Accelerated Policy Installation and Monitoring Status
- Elevating Security with HTTPS Inspection

- Deploying Identity Awareness
- Customizing Threat Prevention
- Configuring a Site-to-Site VPN with an Interoperable Device
- Deploying Remote Access VPN
- Configuring Mobile Access VPN
- Monitoring Policy ComplianceReporting SmartEvent Statistics
- Tuning Security Gateway Performance
