## CLIENT INDUSTRY - GLOBAL TRANSPORTATION

Our client is the transportation industry's global leader, providing rapid, reliable, time-definite delivery to more than 220 countries and territories, connecting markets that comprise more than 99% of the world's gross domestic product.

## CHALLENGES

The client's key security personnel were working with Check Point technology products but were only equipped with intermediate level certification and experience.

They were missing key knowledge in some areas, putting this transportation company and those who depended on it at risk.

## SOLUTIONS

Our Red Education account management team took the time needed to fully understand the client's needs. They explored options of schedules to find the best fit and staying in constant contact to keep the client updated.

We assisted in securing seats for the courses that matched the client's skills gap and were best aligned to his schedule and needs.

## OUTCOMES

*"The training helped me gain a firmer understanding of Check Point products and helped me fill the gap in my skills. I learnt new skills that were applied during my daily work."*

*I want to express my great appreciation to all the lecturers, and also especially to Nash who helped us arrange our courses well. I thank them all!"*
