Red Education

★★★★★ 98% of students recommend Red Education

SECTOR - BANKING

Our client is the largest bank in the Philippines and also one of the largest banks in South East Asia.

CHALLENGES

The Bank's engineering team was facing a significant deficit in skill-based knowledge, prompting the need for upskilling. Recognizing the need to increase their team's expertise, the bank sought out a reliable training provider. An initial positive experience with Red Education convinced the bank to build a relationship and engage us for ongoing training needs.

SOLUTIONS

Last minute changes from the client were accommodated by the Red Education Team, with an agile response and and communication back and forth needed to allow the training program to go ahead smoothly. Logistical challenges were overcome by Account Manager Nash M and our Operations Team to ensure the successful delivery of a Check Point Certified Security Expert (CCSE) private class for the client's team of fifteen engineers by our expert trainer Nandagopal Siddegowda.

OUTCOMES

The bank was able to upskill its team of engineers, empowering them to manage and maintain their Check Point technology, preventing any mishaps or errors that could be costly and damage their reputation. The engineers are now better equipped with the critical knowledge they need to do their jobs successfully, and the dangerous skills gap was filled.
